

OPERATION FISTULA

Fistula is a childbirth injury caused by prolonged, obstructed labour without prompt medical attention.

A Pilot Program run from 2012 to 2015 in the African continent proved to be immensely successful.

Countries covered	Patients treated	Success Rate
5	638	88%

Women are **losing** more than 2 healthy years of their lives as a result of fistula. However, access to proper surgical treatment can help them **gain** 12 years of a healthy and fistula-free life.

Now you can help create a fistula free world

\$1 can give back 23 days of fistula-free live to a person
